Subject Index

Acetophenone
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Acetylene hydrochlorination
Vapour phase hydrochlorination of acetylene with group VIII and IB metal chloride catalysts (43)33
Adsorption
PTFE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. II. Water poisoning (43)15
Adsorption
Selective hydrogenation of neat isoquinoline. II. Reaction pathway over Raney nickel (43)71
Adsorption
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177
Ageing
PTFE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. I. Preparation and characterization (43)1
Ageing
Methanol conversion to hydrocarbons using modified clinoptilolite catalysts: Investigation of catalyst lifetime and reactivation (43)133
Ageing
Effect of Na^+ on sulphation and related reactions over a commercial Claus alumina catalyst (43)167
Aldolisation
Transformation of ethanol into 1,3-butadiene over magnesium oxide/silica catalysts (43)117
Alumina
Effect of Na^+ on sulphation and related reactions over a commercial Claus alumina catalyst (43)167
Aromatization
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species in propane transformation on GaHZSM5 catalysts (43)155
Automated test bench
Automated testing of methanol synthesis catalysts (43)305

Bed loading
Pilot plant testing of hydrotreating catalysts: Influence of catalyst condition, bed loading and dilution (43)253
Butadiene
Transformation of ethanol into 1,3-butadiene over magnesium oxide/silica catalysts (43)117
Butadiene hydrogenation
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177

Carbonaceous residues
About coke deposition on zeolite HY. A ^{129}Xe-NMR study (43)L5
Catalyst bed dilution
Pilot plant testing of hydrotreating catalysts: Influence of catalyst condition, bed loading and dilution (43)253
Catalyst bed dilution
Design of laboratory hydrotreating reactors scaling down of trickle-flow reactors (43)277
Catalyst characterization (ammonia desorption)
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species in propane transformation on GaHZSM5 catalysts (43)155
Catalyst characterization (Auger electron spectroscopy)
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177
Catalyst characterization (frontal chromatography)
Investigation of the dispersion of supported copper catalysts by oxygen adsorption and nitrous oxide decomposition (43)91
Catalyst characterization (surface science)
In situ study of catalysts. Application in methanol synthesis and ethylene epoxidation (43)315

Catalyst characterization
(temperature-programmed desorption)
Transformation of ethanol into 1,3-butadiene over magnesium oxide/silica catalysts (43)117
Catalyst preparation (in situ)
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Catalyst preparation (incipient wetness)
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Catalyst preparation (polymer coating)
PTFE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. I. Preparation and characterization (43)1
Catalyst preparation (wet impregnation)
Preparation of iron/zeolite catalysts active for toluene disproportionation in the presence of hydrogen sulphide (43)57
Claus alumina
Effect of Na^+ on sulphation and related reactions over a commercial Claus alumina catalyst (43)167
Clinoptilolite
Methanol conversion to hydrocarbons using modified clinoptilolite catalysts: Investigation of catalyst lifetime and reactivation (43)133
Cobalt-molybdenum sulphide/alumina
Upflow versus downflow testing of hydrotreating catalysts (43)239
Coke formation
About coke deposition on zeolite HY. A ^{129}Xe-NMR study (43)L5
Coke formation
Effect of the temperature regime of methanol conversion to hydrocarbons on coking of zeolite catalysts and their regeneration (43)85
Copper/silica
Support and morphological effects in the synthesis of methanol over Cu/ZnO, Cu/ZrO_2 and Cu/SiO_2 catalysts (43)141
Copper zinc oxide
Investigation of the dispersion of supported copper catalysts by oxygen adsorption and nitrous oxide decomposition (43)91
Copper/zinc oxide
Support and morphological effects in the synthesis of methanol over Cu/ZnO, Cu/ZrO_2 and Cu/SiO_2 catalysts (43)141
Copper/zirconium oxide
Investigation of the dispersion of supported copper catalysts by oxygen adsorption and nitrous oxide decomposition (43)91
Copper/zirconium oxide
Support and morphological effects in the synthesis of methanol over Cu/ZnO, Cu/ZrO_2 and Cu/SiO_2 catalysts (43)141

Deactivation
Automated testing of methanol synthesis catalysts (43)305
Deuterium
PFTE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. I. Preparation and characterization (43)1
Dispersion
Investigation of the dispersion of supported copper catalysts by oxygen adsorption and nitrous oxide decomposition (43)91
Downflow
Upflow versus downflow testing of hydrotreating catalysts (43)239

Ethylene epoxidation
In situ study of catalysts. Application in methanol synthesis and ethylene epoxidation (43)315
EUROPT-1
Skeletal reactions of n-hexane over Pt/SiO_2 (EUROPT-1). Mechanism changeover governed by hydrogen (43))L1.

Fischer-Tropsch
Comments on induction periods for synthesis of hydrocarbons from syngas over metal/zeolite catalysts using a two stage process (43)193
Fluid catalytic cracking
FCC catalyst performance evaluation (43)213

GaHZSM5
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species

in propane transformation on GaHZSM5 catalysts (43)155
Gasoline production
FCC catalyst performance evaluation (43)213

Hydrochlorination
Vapour phase hydrochlorination of acetylene with group VIII and IB metal chloride catalysts (43)33
Hydrodesulphurization
Upflow versus downflow testing of hydrotreating catalysts (43)239
Hydrogen transfer
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Hydrogenation
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177
Hydrophobic catalysts
PTFE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. I. Preparation and characterization (43)1
Hydrophobic catalysts
PFTE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. II. Water poisoning (43)15
Hydrotreating
Pilot plant testing of hydrotreating catalysts: Influence of catalyst condition, bed loading and dilution (43)253
Hydrotreating catalysts
Upflow versus downflow testing of hydrotreating catalysts (43)279
Hydrotreating reactors
Design of laboratory hydrotreating reactors scaling down of trickle-flow reactors (43)277
HZSM-5
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species in propane transformation on GaHZSM5 catalysts (43)155

Induction periods
Comments on induction periods for synthesis or hydrocarbons from syngas over metal/zeolite catalysts using a two stage process (43)193
Iron/zeolite
Preparation of iron/zeolite catalysts active for toluene disproportionation in the presence of hydrogen sulphide (43)57
Isoquinoline
Selective hydrogenation of neat isoquinoline. II. Reaction pathway over Raney nickel (43)71
Isotopic exchange
PTFE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. I. Preparation and characterization (43)1
Isotopic exchange
PFTE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. II. Water poisoning (43)15

Kinetics
PTFE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. II. Water poisoning (43)15
Kinetics
Selective hydrogenation of neat isoquinoline. II. Reaction pathway over Raney nickel (43)71
Kinetics
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species in propane transformation on GaHZSM5 catalysts (43)155
Kinetics
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177
Kinetics
In situ study of catalysts. Application in methanol synthesis and ethylene epoxidation (43)315

Lanthanum oxide
Comparative study of catalysts for the oxidative coupling of methane (43)105

Magnesium oxide
Comparative study of catalysts for the oxidative coupling of methane (43)105
Magnesium oxide/silica
Transformation of ethanol into 1,3-butadiene over magnesium oxide/silica catalysts (43)117
Magnesium oxide

Comparative study of catalysts for the oxidative coupling of methane (43)105
Metal chloride catalysts
Vapour phase hydrochlorination of acetylene with group VIII and IB metal chloride catalysts (43)33
Metal/zeolite
Comments on induction periods for synthesis of hydrocarbons from syngas over metal/zeolite catalysts using a two stage process (43)193
Methane oxidation
Comparative study of catalysts for the oxidative coupling of methane (43)105
Methanol conversion
Effect of the temperature regime of methanol conversion to hydrocarbons on coking of zeolite catalysts and their regeneration (43)85
Methanol conversion
Methanol conversion to hydrocarbons using modified clinoptilolite catalysts: Investigation of catalyst lifetime and reactivation (43)133
Methanol synthesis
Support and morphological effects in the synthesis of methanol over Cu/ZnO, Cu/ZrO_2 and Cu/SiO_2 catalysts (43)141
Methanol synthesis
In situ study of catalysts. Application in methanol synthesis and ethylene epoxidation (43)315
Methanol synthesis catalysts
Automated testings of methanol synthesis catalysts (43)305

Nickel
Effect of pore diffusion on the triacylglycerol distribution of partially hydrogenated trioleoylglycerol (43)339
Nitrous oxide decomposition
Investigation of the dispersion of supported copper catalysts by oxygen adsorption and nitrous oxide decomposition (43)91
Nuclear magnetic resonance
About coke deposition on zeolite HY. A ^{129}Xe-NMR study (43) L5

Oxygen adsorption
Investigation of the dispersion of supported copper catalysts by oxygen adsorption and nitrous oxide decomposition (43)91

Palladium
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Pilot plant
Pilot plant testing of hydrotreating catalysts: Influence of catalyst condition, bed loading and dilution (43)253
Pilot plant
Activity of steam reforming catalysts: Role and assessment (43)287
Platinum
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177
Platinum/silica
Skeletal reactions of n-hexane over Pt/SiO_2 (EUROPT-1). Mechanism changeover governed by hydrogen (43)L1
Polytetrafluoroethene
PFTE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. I. Preparation and characterization (43)1
Polytetrafluoroethene
PFTE dispersed hydrophobic catalysts for hydrogen-water isotopic exchange. II. Water poisoning (43)15
Pore diffusion
Effect of pore diffusion on the triacylglycerol distribution of partially hydrogenated trioleoylglycerol (43)339

Raney nickel
Selective hydrogenation of neat isoquinoline. II. Reaction pathway over Raney nickel (43)71
Reactivation
Methanol conversion to hydrocarbons using modified clinoptilolite catalysts: Investigation of catalyst lifetime and reactivation (43)133
Regeneration
Vapour phase hydrochlorination of acetylene with group VIII and IB metal chloride catalysts (43)33
Regeneration
Effect of the temperature regime of meth-

anol conversion to hydrocarbons on coking of zeolite catalysts and their regeneration (43)85
Regeneration
Effect of Na^+ on sulphation and related reactions over a commercial Claus alumina catalyst (43)167
Riser cracker
FCC catalyst performance evaluation (43)213

Samarium oxide
Comparative study of catalysts for the oxidative coupling of methane (43)105
Scaling down
FCC catalyst performance evaluation (43)213
Scaling down
Design of laboratory hydrotreating reactors scaling down of trickle-flow reactors (43)277
Scaling down
Activity of steam reforming catalysts: Role and assessment (43)287
Selectivity
Skeletal reactions of n-hexane over Pt/SiO_2 (EUROPT-1). Mechanism changeover governed by hydrogen (43)L1
Selectivity
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Selectivity
Selective hydrogenation of neat isoquinoline. II. Reaction pathway over Raney nickel (43)71
Selectivity
Comparative study of catalysts for the oxidative coupling of methane (43)105
Selectivity
Transformation of ethanol into 1,3-butadiene over magnesium oxide/silica catalyst (43)117
Selectivity
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species in propane transformation on GaHZSM5 catalysts (43)155
Selectivity
Hydrogenation of 1,3-butadiene on Pt(111). Comparison with results on Pt(110) and Pt(100) (43)177
Selectivity
Effect of pore diffusion on the triacylglycerol distribution of partially hydrogenated trioleoylglycerol (43)339
Sepiolite
Reduction of acetophenone with palladium catalysts by hydrogen transfer and with molecular hydrogen (43)41
Shaped catalysts
Upflow versus downflow testing of hydrotreating catalysts (43)239
Skeletal reactions
Skeletal reactions of n-hexane over Pt/SiO_2 (EUROPT-1). Mechanism changeover governed by hydrogen (43)L1
Sodium modifier
Effect of Na^+ on sulphation and related reactions over a commercial Claus alumina catalyst (43)167
Steam reforming catalysts
Activity of steam reforming catalysts: Role and assessment (43)287
Syngas
Activity of steam reforming catalysts: Role and assessment (43)287
Syngas conversion
Support and morphological effects in the synthesis of methanol over Cu/ZnO, Cu/ZrO_2 and Cu/SiO_2 catalysts (43)141
Syngas conversion
Comments on induction periods for synthesis of hydrocarbons from syngas over metal/zeolite catalysts using a two stage process (43)193

Testing
FCC catalyst performance evaluation (43)213
Testing
Upflow versus downflow testing of hydrotreating catalysts (43)239
Testing
Pilot plant testing of hydrotreating catalysts: Influence of catalyst condition, bed loading and dilution (43)253
Testing
Design of laboratory hydrotreating reactors scaling down of trickle-flow reactors (43)277

Testing
Activity of steam reforming catalysts: Role and assessment (43)287
Testing
Automated testing of methanol synthesis catalysts (43)305
Testing
In situ study of catalysts. Application in methanol synthesis and ethylene epoxidation (43)315
Testing
Effect of pore diffusion on the triacylglycerol distribution of partially hydrogenated trioleoylglycerol (43)339
Toluene disproportionation
Preparation of iron/zeolite catalysts active for toluene disproportionation in the presence of hydrogen sulphide (43)57
Triacylglycerol distribution
Effect of pore diffusion on the triacylglycerol distribution of partially hydrogenated trioleoylglycerol (43)339
Trickle-flow reactors
Design of laboratoy hydrotreating reactors scaling down of trickle-flow reactors (43)277
Trioleoylglycerol hydrogenation
Effect of pore diffusion on the triacylglycerol distribution of partially hydrogenated trioleoylglycerol (43)339
Upflow
Upflow versus downflow testing of hydrotreating catalysts (43)239

Vinyl chloride
Vapour phase hydrochlorination of acetylene with Group VIII and IB metal chloride catalysts (43)33

Zeolites
Preparation of iron/zeolite catalysts active for toluene disproportionation in the presence of hydrogen sulphide (43)57
Zeolites
Effect of the temperature regime of methanol conversion to hydrocarbons on coking of zeolite catalysts and their regeneration (43)85
Zeolite HY
About coke deposition on zeolite HY. A ^{129}Xe-NMR study (43)L5
Zeolites
Conversion of light alkanes to aromatic hydrocarbons. II. Role of gallium species in propane transformation on GaHZSM5 catalysts (43)155
ZSM-5
Effect of the temperature regime of methanol conversion to hydrocarbons on coking of zeolite catalysts and their regeneration (43)85
